

Course Overview

According to Temasek Holdings and Google, the size of Singapore's eCommerce market is predicted to grow by more than five times to be worth [S\\$7.5 billion within 10 years](#) – more than the valuation of the casino industry here valued at US\$4 billion.

More and more retailers are adopting an omni-channel approach, with e-commerce tripling from 2.1 percent to making up 6.7 percent of all retail in Singapore. This growing trend is also apparent in five other South-east Asian countries – Indonesia, Vietnam, Philippines, Thailand, and Malaysia, also forecasted to have e-commerce markets worth more than US\$5 billion by 2025. Having an online presence is no longer an option if businesses want to thrive on the growing trend of e-commerce.

Course Highlights

In this 2-day E-commerce Website Creation Course, participants will learn:

- How to start an online store from scratch (Step-by-step)
