Course Description

Used by some of the most well-known Fortune 500 companies in the world including Sony, Gm, UPS, and international news sites including CNN, Forbes, and The New York Times, WordPress has come a long way to become one of the World Wide Web’s most popular and free open-source content management system.

As of 2017, WordPress now powers 28.2% of the web, that’s 1 in 4 websites on the world wide web. – Source W3tech.

In this 2-day fun and interactive hands-on course, you will learn how to create, customise, and maintain a WordPress website from scratch. An individual demo domain and web hosting account will be provided to you for a practical experience in creating a modern website from scratch.

Student Work

Below are some examples of websites created by our attendees that you are able to create by the end of the 2-day course.

Course Objectives

By the end of the workshop, participants will:

- Be able to create a simple modern-looking catalogue website.
- Be able to manage and maintain a WordPress website including how to edit and update web content, format copy, install plugins, and manage media.
- Understand modern web design concepts and how to turn visitors into leads.
- Be familiar with creating business emails and syncing emails with third party email software such as Gmail and Microsoft Outlook.
- Understand basic on-page Search Engine Optimization to improve a website's search engine friendliness.
- Know how to integrate E-Commerce into a WordPress installation and understand how various payment gateways work.
- Be able to secure, back up a WordPress website, and transfer the entire site to another domain or web host.

Target Audience

Marketing executives, Managers, Administrative Staff, Solopreneurs, Graphic Designers, Content Developers, Web Developers, and Individuals who want to learn how to create, customise, and maintain a WordPress website.

Prerequisite

Each participant will be provided with a windows laptop for the duration of the course. Participants may however opt to bring their own laptops.

Basic computer knowledge is required for this course. No prior coding knowledge is required.

A demo domain name and web hosting account will be provided to each participant to install and set up WordPress from scratch. (Optional: Participants may choose to buy a domain name and web hosting account and set up WordPress with it during class.)

Certification

A Certification of Completion will be issued upon achieving at least 75% attendance for the course. Course Code: [CRS-N-0043888](#)

Instructor

Chan Teck Seng

Teck Seng is the founder of Lemonade IT, a Singaporean creative design agency specialising in web design and development.

As a webmaster and SEO consultant for leading companies, Teck Seng and his team created and managed websites that attained high conversion rates.

With more than 15 years of experience, his team has worked on web development projects spanning the South East Asian region. Lemonade It has also recently added the websites of Takashimaya Astro Arena (Malaysia), and Pezzo Pizza to their portfolio. All their projects reported a significant increase in leads and online conversions.

He believes that the foundation for strong branding lies in brand visibility – empowered by building websites that are both machine and human friendly.

Teck Seng is Google AdWords and Google Analytics certified. His works has earned him numerous accolades and praises, for both their design and skills in digital development. Teck Seng and his team were awarded by CSSWinner, CSSDesign Awards, Singapore Website Award (SWA).
